Daniel Torres' life

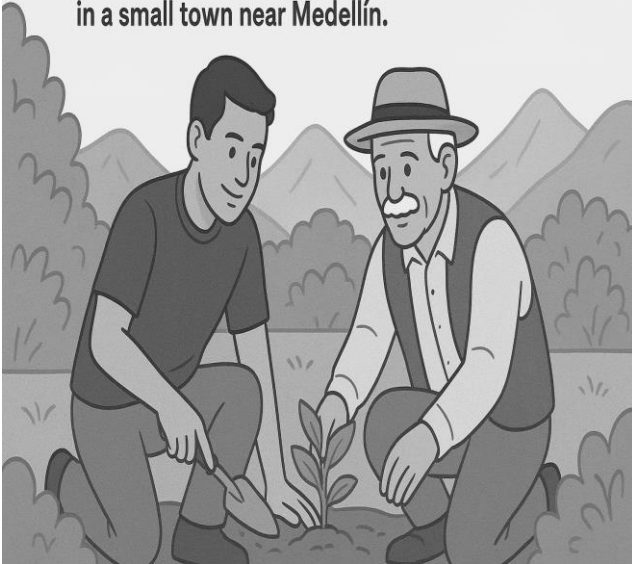

My name is Daniel Torres, I am 22 years old, and I am Colombian. I live in Medellín with my parents, Laura and Jorge, and my younger sister Camila; I also have an older brother named Andrés, but he lives in another city. I am single, and I study Systems Engineering at the University of Antioquia. My birthday is on September 3rd, and our address is Carrera 45 # 30–22. At home, I have two pets: a dog named Max and a cat named Luna. My favorite subject is Science, and my favorite food is bandeja paisa. In my free time, I like playing video games, listening to music, and riding my bike in the park near my house.

Every day, I wake up at 6:00 a.m., and I take a shower before I have breakfast with my family. I go to the university at 7:30 a.m., and I attend my classes until noon. In the afternoon, I usually study at the library, but I don't relax much because I want to finish my work early. After I get home, I walk my dog Max, and I help my sister with her homework. I don't watch TV during the week, but I listen to music before I go to bed. I usually go to sleep at 10:30 p.m., and I don't stay up late on weekdays. On weekends, I sometimes meet my friends and play soccer in the park.

Last weekend, I visited my grandparents in a small town near Medellín.

Last weekend, I visited my grandparents in a small town near Medellín. I was all morning with my grandfather in the garden, and later I cooked lunch with my grandmother. In the afternoon, we went for a walk, and we took many pictures of the mountains. I also played soccer with my cousins, and we had a great time together. On Sunday, I came back home early, and I finished my homework, but I didn't go out because it was raining. I watched a movie with my family, and we ate popcorn. It was a simple but very happy weekend, and it made me feel grateful for my family and friends.

In my life, I have learned many things that have helped me. I have traveled to several cities in Colombia, and I have visited important museums and natural parks. I have participated in technology events at the university, and I have won two small awards for my programming projects. I have met people from different countries, and I have practiced my English with them. I also have helped my sister with her school projects, and together we have created fun presentations. These experiences have taught me to be more responsible and confident about my future. I feel happy with all I have done, and I am excited about all the things I have experienced.
